

CENSUS 2000  
Seattle, Washington

## Population Density by Census Tract

Strategic Planning Office  
City of Seattle  
April 11, 2001

Population Density  
(Avg. # Persons/Acre)

Arterials

### Notes:

- 1) Census 2000 redistricting data are not adjusted. The Census Bureau's Executive Steering Committee on Accuracy and Coverage Evaluation (A.C.E.) Policy, or ESCAP, has recommended that unadjusted census data be released as the Census Bureau's official redistricting data.
- 2) Tracts 264 and 265 extend beyond Seattle's city limits; only the portion of each tract within city limits is shown here. A population density value was not calculated for these tracts.
- 3) The density calculation is based on the land area of each tract. The land areas of three tracts have been adjusted to account for major interior lakes (Green, Bitter, and Haller).
- 4) Data classification method: natural breaks (Jenks' optimization method).
